PROFILE

Frontend Developer with 5 years of experience in building high-performance, scalable web applications. Expert in Vue.js, Nuxt.js, TypeScript, and real-time data integration. Strong focus on responsive design, performance optimization, and API integration. Proven track record in e-commerce, fintech, and gaming projects, delivering high-quality solutions with a focus on security and user experience.

EXPERIENCE

FRONT-END DEVELOPER (*Project-based*)

GTA5 Custom Server

August 2024 - October 2024

- Developed a dynamic and interactive user interface for seamless interaction with the GTA5 server, ensuring an immersive user experience.
- Utilized Vue.js to build responsive, real-time interfaces, enhancing the gaming experience with smooth interactions and data flow.
- Implemented SCSS for scalable and maintainable styling, ensuring a polished and consistent visual design across the application.
- Designed and optimized the UI for cross-device compatibility, ensuring flawless performance and usability across various screen sizes and platforms.
- Integrated real-time API interaction, enabling instant updates and server communication to enhance user engagement.
- Collaborated with the backend team to ensure seamless data synchronization between the frontend and server, maintaining performance and stability.

FRONT-END DEVELOPER

VMWare Platform Clone

August 2022 - July 2024

- Led the development of an advanced data management interface, providing users with intuitive and efficient access to complex data systems.
- Utilized Nuxt.js for server-side rendering and optimized performance, ensuring fast and scalable user experiences.
- Implemented TypeScript for enhanced code quality, type safety, and maintainability, ensuring robust and error-free functionality.
- Developed and configured seamless API interactions, enabling smooth data synchronization and real-time updates for optimal user experience.
- Integrated Pinia for efficient state management, ensuring consistent data flow and dynamic updates across the interface.
- Employed Tailwind CSS to create a modern, responsive design with a focus on usability, delivering a highly flexible and user-friendly interface.

FRONT_END DEVELOPER

Guruh Music

November 2021 - July 2022

- Developed high-performance, scalable music streaming applications, ensuring smooth and reliable playback for users across mobile and desktop devices.
- Implemented a dynamic user interface using Vue.js, optimized for responsive design, delivering an immersive music experience on various screen sizes.
- Utilized Vuex for efficient state management, ensuring smooth handling of user interactions, playlists, and media content across the platform.
- Applied Tailwind CSS and SCSS to craft modern, intuitive UI components, ensuring consistency and a responsive design across devices.
- Conducted extensive debugging and testing by writing comprehensive unit and integration tests, ensuring full test coverage and maintaining high code quality.

EDUCATION

Yerevan State Engineering College
2012-2015

LANGUAGES

- English
- Russian
- Armenian

FRONT_END DEVELOPER

March 2021 - October 2021

Messaging Platform

- Developed a secure real-time messaging application optimized for both web and mobile platforms, tailored for internal company use.
- Designed and implemented an intuitive user interface for seamless and efficient message exchange.
- Configured WebSocket to enable instant, real-time communication between users, ensuring low-latency and reliable message delivery.
- Ensured responsive design, making the platform fully adaptable to various screen sizes, providing a consistent user experience across devices.
- Collaborated closely with backend engineers to ensure smooth integration and data synchronization for the messaging system.

FRONT_END DEVELOPER

July 2020 - February 2021

CashFly

- Developed scalable user interfaces for managing and displaying financial data, ensuring a user-friendly and efficient experience for financial transactions.
- Integrated the frontend with API services to process financial transactions securely and in real-time, ensuring smooth operation and data flow.
- Focused on data security, implementing measures to safeguard sensitive financial information and comply with industry standards.
- Utilized Vue.js and Vuex to manage application state and create dynamic, responsive components that adapted to complex financial data.
- Employed TypeScript for strong typing and improved code quality, alongside SCSS for efficient and maintainable styling, ensuring a polished and consistent interface.

FRONT_END DEVELOPER

November 2019 - June 2020

Lucky Lepricon

- Developed interactive user interfaces for an online gaming platform, providing a seamless and engaging experience for players.
- Implemented real-time updates to ensure game data, scores, and player interactions were synchronized instantly, enhancing gameplay.
- Focused on data security to protect sensitive user information and prevent unauthorized access, ensuring a safe gaming environment.
- Utilized Vue.js for building dynamic, reactive components, and Pinia for efficient state management across the platform.
- Employed TypeScript for improved code clarity and error prevention, alongside SCSS to create a responsive and visually appealing design across devices.

FRONT_END DEVELOPER(*Project-based*)

January 2019 - October 2019

JanVanSundert

- Maintained and enhanced an existing e-commerce platform, ensuring continuous performance improvements and seamless functionality.
- Developed and implemented new UI components to expand the site's features and improve the overall shopping experience.
- Wrote clean, efficient code for application logic, ensuring smooth interaction and data flow across the platform.
- Created responsive web pages by accurately translating designs into pixel-perfect layouts, using Tailwind CSS and Bootstrap for flexible styling.
- Focused on optimizing page load times and ensuring a smooth, high-performance user experience for visitors across various devices.
